**UAMS Received \$3 Million to Reimburse Facilities
that Provide Medication-Assisted Treatment for Opioid Use**

LITTLE ROCK — The University of Arkansas for Medical Sciences (UAMS) recently received \$3 million from the Arkansas Department of Human Services (DHS) to compensate facilities across the state providing medication-assisted treatment to opioid use disorder patients.

The money will allow medical providers to offer treatment for opioid use disorder to patients without insurance or the ability to pay for services. This new effort is an offshoot of MATRIARC (Medication Assisted Treatment Recovery Initiative for Arkansas Rural Communities), a partnership between UAMS' Psychiatric Research Institute and DHS.

The funds will cover expenses including the cost of medication, hiring peer support specialists, providing treatment services and even travel costs for patients using medication-assisted treatment.

“We are really the stewards of the money, our job is to give it away,” said Michael Mancino, M.D., a professor in the UAMS College of Medicine’s Department of Psychiatry who oversees the MATRIARC program. “We are working with clinics already providing medication-assisted treatment to people below the poverty line, so they don’t have to turn anyone away. We look forward to continuing these efforts with previous and new awardees.”

Medication-assisted treatment involves the use of medication to relieve cravings and withdrawal symptoms along with counseling and support to overcome the use of opioids.

The following agencies have been awarded grants to provide office-based medication-assisted treatment for individuals with opioid use disorders: ARISA HEALTH of Springdale; Western Arkansas Counseling and Guidance Center of Fort Smith; Healing Hands Addiction Center of Warren; Ouachita Behavioral Health & Wellness of Hot Springs; Counseling Services of Jacksonville; The Guinn Clinic of El Dorado; Natural State Recovery Centers of Little Rock; Aurora Rehabilitation Clinic of Fayetteville; Compassionate Care Clinic of Searcy; River Valley Medical Wellness of Russellville; A Better You Med Spa of Springdale; Vaught Care Center of Horatio; True Self Recovery

of Rogers; and Wellness Clinic and Healthcare Consulting of Camden. Based on the areas covered by the awarded agencies, 57 out of the state's 75 counties will have access to medication-assisted treatment for opioid use disorders.

Medication-assisted treatment includes methadone, which can only be dispensed through an opiate treatment program; products containing buprenorphine, which require a federal waiver for prescribers; and injectable naltrexone, which does not require special qualifications for prescribing. Research has shown that a combination of medication-assisted treatment and behavioral therapy can successfully treat opioid use disorder and help sustain recovery.

UAMS is the state's only health sciences university, with colleges of Medicine, Nursing, Pharmacy, Health Professions and Public Health; a graduate school; hospital; a main campus in Little Rock; a Northwest Arkansas regional campus in Fayetteville; a statewide network of regional campuses; and seven institutes: the Winthrop P. Rockefeller Cancer Institute, Jackson T. Stephens Spine & Neurosciences Institute, Harvey & Bernice Jones Eye Institute, Psychiatric Research Institute, Donald W. Reynolds Institute on Aging, Translational Research Institute and Institute for Digital Health & Innovation. UAMS includes UAMS Health, a statewide health system that encompasses all of UAMS' clinical enterprise including its hospital, regional clinics and clinics it operates or staffs in cooperation with other providers. UAMS is the only adult Level 1 trauma center in the state. *U.S. News & World Report* named UAMS Medical Center the state's Best Hospital; ranked its ear, nose and throat program among the top 50 nationwide; and named six areas as high performing — COPD, colon cancer surgery, heart failure, hip replacement, knee replacement and lung cancer surgery. UAMS has 2,876 students, 898 medical residents and four dental residents. It is the state's largest public employer with more than 10,000 employees, including 1,200 physicians who provide care to patients at UAMS, its regional campuses, Arkansas Children's Hospital, the VA Medical Center and Baptist Health.
